Cargo Net

Universal Floating Object

UFO

Instructions For Use

www.XSscuba.com

The Cargo Net is a great addition to the UFO. It provides a useful way to secure larger, bulky items, like a wetsuit or towel, especially when wearing the UFO on your back to and from a dive site.

Installation

Examine your Cargo Net and you will see that it forms a rectangle. It can be mounted lengthwise for a tighter application, or rotated 90º, cross ways, for a looser application.

Insert a single strand of bungee from the corner of the Cargo Net into one of the retaining hooks (Fig. 1). Follow with the other 3 corners (Fig. 2).
